AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS

1. (currently amended) A flat display, comprising:
 - a first stand;
 - a second stand detachably connected to the first stand; and
 - a main body selectively supported only by the second stand while the first stand is connected to the second stand or merely by the first stand.
2. (Original) The flat display as claimed in claim 1, wherein the first stand is hinged on the main body.
3. (Original) The flat display as claimed in claim 1, wherein the second stand has a flat bottom surface to stabilize the main body when the main body is supported by the second stand.
4. (Original) The flat display as claimed in claim 1, wherein the second stand is hollow to house the first stand when the first and second stands are connected.
5. (Original) The flat display as claimed in claim 4, wherein the second stand includes a rail inside for guiding insertion of the first stand into the second stand.
6. (Original) The flat display as claimed in claim 4, further comprising a spring disposed in the second stand to push against the first stand when the first stand is housed in the second stand.

7. (Original) The flat display as claimed in claim 4, wherein the first stand defines a hole, and the second stand includes an engaging portion fit into the hole when the first and second stands are connected.

8. (Original) The flat display as claimed in claim 7, wherein the second stand further includes a button to release the engaging portion from the hole when the second stand is detached from the first stand.

9. (New) A flat display, comprising:

a main body;

a first stand for connecting to the main body;

a second stand being hollow for receiving therein the first stand when the first stand and the second stand are connected; and

wherein the main body is selectively supported either only by the second stand while the first stand connected to the second stand or only supported by the first stand while the first stand separated from the second stand.

10. (New) The flat display as claimed in claim 9, wherein the first stand is hinged on the main body.

11. (New) The flat display as claimed in claim 9, wherein the second stand has a flat bottom surface to stabilize the main body when the main body is supported by the second stand.

12. (New) The flat display as claimed in claim 9, wherein the second stand includes a rail inside for guiding insertion of the first stand into the second stand.

13. (New) The flat display as claimed in claim 9, further comprising a spring disposed in the second stand to push against the first stand when the first stand is housed in the second stand.
